

half_float::detail::sin

half_float::detail::sin

half_float::detail
::functions::sin

```
graph LR; A[half_float::detail::sin] --> C[half_float::detail::functions::sin]; B[half_float::detail::sin] --> C;
```

The diagram illustrates a mapping or resolution process. On the left, there are two separate boxes, each containing the text 'half_float::detail::sin'. Blue arrows from both of these boxes point towards a single, larger box on the right. This box is shaded gray and contains the text 'half_float::detail' on the top line and '::functions::sin' on the bottom line. This suggests that the two individual identifiers on the left are being consolidated or resolved into a single, more specific identifier on the right.
