half_float::detail
::frexp

half_float::detail
::functions::frexp

```
graph LR; A["half_float::detail::frexp"] --> C["half_float::detail::functions::frexp"]; B["half_float::detail::frexp"] --> C;
```

The diagram illustrates a mapping or resolution process. On the left, there are two separate boxes, each containing the text 'half_float::detail::frexp'. Blue arrows from both of these boxes point towards a single, larger box on the right. This right-hand box is shaded gray and contains the text 'half_float::detail::functions::frexp'. This suggests that the two individual references on the left are being consolidated or resolved to a single, more specific function location on the right.
